

WTA SERVICES- PERMIT DEPARTMENT

Over Axle Permit (Overweight)

An over axle permit is for a load that falls within the legal gross weight, but axle(s) is over the legal weight limit. Over axle weight on an axle would be weight exceeding 20,000 pounds on a single axle and 34,000 pounds on a set of tandems. Tridem weight would depend on the measurement between the three axles. After determining the distance, check the vehicle weight table to see what the legal capacity would be. The price of the permit is calculated with the amount of weight over the legal axle weight and the number of miles to be traveled.
