

# WTA Member Fuel Purchase Program Cardlock Features & Benefits

PetroCard offers a fueling program with access to over 25,000 locations nationwide through our affiliation with our major cardlock networks, Pacific Pride, CFN and Fuelman. Cardlocks are unattended and completely automated fueling stations similar to ATMs, but they dispense fuel rather than cash. Locations are easily accessible and accommodate large commercial vehicles, allowing customers to fuel quickly, saving time and money.

Our program is unique because it is designed from your requirements. Fleet managers prefer a cardlock fueling program because of the control they gain over their organization's fuel purchases by only allowing fuel and oil purchases. Increase your control by allowing PetroCard to create a customized program that meets the needs of your business.

## Convenient and Accessible Fueling Facilities

PetroCard gives you access to hundreds of fueling locations in Washington state and thousands across the country. Clean and well-lit, our cardlock facilities are open 24 hours a day, seven days a week.

## Accurate Fuel Management and Reporting

PetroCard's custom software provides detailed reporting, itemized billing and all the information you need to more effectively manage your fleet.

## Online Account Management

It's quick and easy to access your account online. You can review, print and download fueling information and reports, update your account, track expenses and more.

## Volume Discount Pricing

PetroCard offers volume discounts for members of the WTA. There are no monthly fees. (This program is only available to members not currently using Pacific Pride through other franchisees.)

## Unmatched Personal Service

PetroCard provides much more than just fuel. We're committed to first-class customer service that includes a convenient online account management system, 24-hour emergency response and more. If there's a problem, our fast, friendly customer service specialists will take care of it.

## Enhanced Security

PetroCard provides a wide range of options that help reduce unauthorized purchases and other security issues. You set the authorized controls for fuel types, locations and quantity restrictions for complete peace of mind.
